THE SUB-TREASURY .

· The Constitution of the United States con fides the sword to the Executive, but the purse strings to the Legislature; and yet the sub-trens uty selieme is now denominated by the locofocos, as a "democratic measure ' When a similar measure was proposed in 1834, the Globe. the official organ of the administration, denouased it in the following set terms

"Disorganizing and revolutionary, subversive of the fundamental principles of our gavernment, and of its en-tire practice from 1780 down to this day " Further says the Globe

"It is palnable as the sun, that the effect of the scheme would be to bring the public treasure murk reaver the actual custody and control of the President, than it is now, and expuse it to be plandered by a hundred hands, where

It has puzzled a good many heads to know where this sub-ties mary system first originated A correspondent of the Portsmouth Journal has any act or resolve to that effect) Therefore, thrown some light upon the subject, as will be seen by the following extract

CALLED FOR BY THE DEMOCRAT. The Bangor Democrat, evidently for the purpose of appearing monest and nonviable for the sight offits readily, on the 13th insticalled for information respecting the indicknent of the Land Agent for the erection of the Aronstock Beom, and although the information called for was promptly furnished by one of the members of the own party, and a member of the last Legislature too, the Democrat refused to publish it, and has remained slent upon the subject for ele nearly a month. That a paper, pretending to seek the good of the people, holding out the idea to them, that it is anxious to give them ight, and when that light is furnished by one of its own political friends, that it should en deavor to smother It, is outrageous, and deserves the severest condemnation of the people We find the correspondence to the Eistern Democrat It needs no comment. The facts stated therein speak for themselves.

SOLIDIFICATION OF AIR

The announcement that the elastic invisible gis, to which soda water, champagne, &c owe their grateful and lively propensities, could be brought to a visit le, solid state, under enormous pressure, was not long since made in France, and was actually accomplished at a meeting of the Academy of Science. The exceedingly curious nd interesting, but hazardous, experiment was repeated at a meeting of the British Association for the advancement of Science, and the solid gas was handed about to the members masses or it were divided and broken, and tased and

Professor Webster has recently repeated these experiments in the Labaratory of Cambridge, and succeeded in obtaining large lumps of the solidified grater means of an iron cy finder, capa-ble of sustain not the innerise pressure required The gas was first brought to the state of a liquid by its own pressure, aided by a freezing mixture nird then allowed to expand with great rapidity, by which means a lirge part of the gas was cool ed for below the freezing point of water, and brought to the solid state In this state it was examined by several gentlemen present- When tensive business at double voting, and as the allowed to escape into the air, the carbonic acid same system may be attempted by them in this gas formed denie white clouds, from which the polls, 3325 votes were thrown , in another num and when applied to the hand, produced a most pher, and it may be reduced to 130° below a degree of cold of which we can hardly form an

The pressure required to produce this change from the gaseous to the liquid state, at the tem perature of 608, is about 900 pounds to the inch. but as the materials from which the gas was obtained in Professor Webster s experiments were at more than double that temperature, the pressure must have been somewhere about two tons apou every inch

They will all complaints and all agential are as natural to the human constitution as food, consequently they can never injure even the most dolicate. Like our food, they are digestive, thorefore they enter into the circulation and impart an energy to the blood which enables it to flow with freedom quite to the extremition and consequently to keep the pores of the skin open. which enables it to flow with freedom quite to the extremities, and consequently to keep the porce of the skin open. They are true & perfect purifiers of the blood, because they drain all corrupt humors from that life giving fluid. They impart attenuth and rigor to the whole system, and the effects are beneficial because they only remove those humors which are opposed to benefit. They aid and improve digestion, and sound sleep follows their use because they cleaned the atomach and bowels of those slimy humors which not only irritate and excite the nervous system, but a caralyze and weaken the digestive organs. In short they possess all the good properties that can be claimed for any modicine, and what is very remarkable, it is utterly im-

On Low Spirits I am spirits is a ceriain state of the mind, accompanied by indigistion, wherein the greatest evits are apprehended upon the slightest grounds and the most consequences imagined. Ancient writers supposed this disease to be confined a first to those particular regions of the abdomen technical right or left side of that easity whence comes the name hypochondriasis.

Symptoms The common corporeal symptoms are flatulency in the stomach or bowels acrid error.
